Subject: Shades of Seattle Disposal Update / Request

Mr. Rodin,

I've verified the container numbers from the original investigation by a visit to the Superfund Records Center. I completed the required documentation and sample packaging of all the Shades of Seattle waste at the warehouse. I have coordinated with Philips Services for the disposal, but I've been waiting on Ecology to cut me a RCRA ID (WAD#/WAH#) since the quantity exceeds SQG limits of RCRA. Based upon the documents in the records center, EPA and/or Ecology can/has issued these numbers for the disposal of wastes found at other Shades of Seattle dump sites. All of the wastes in the warehouse are from the University Village dump site, which has not been issued a RCRA ID. Can you assist me in getting a RCRA ID for this site so I can complete this mission?

Thanks in advance for your response.
